

LOGO GO3

Move Your Business Solutions to 3-Dimension!

You can manage your business processes with GO 3 developed with new-generation technologies, and you can also increase your productivity. GO 3 moves the user experience to a totally different dimension with app-in-app technology and features such as role-based customizable desktop, in-product search engine etc.

GO 3

GO 3, the new product of Logo, which has been producing business applications for over 30 years, was developed combining its experience acquired for many years with new generation technologies and aiming to ease of use, and it moves the user experience to a totally different dimension. With GO 3 offering full-scope solution, SMEs minimize the errors in the processes and gain speed while managing the business processes effectively and efficiently.

Create Your Own Desktop Including Only Transactions You Use

With aesthetic desktop design not straining the eyes and customizability feature of GO 3 developed with new generation technologies based on heuristic and easier use, it enables you to quickly and easily access all the information you wish. With GO 3, it is now possible to define, group and collect most frequently used transactions as shortcuts under customized desktops, in addition to default desktops provided depending on the user role. GO 3 enables the users to customize the shortcut keys for speeding up purposes, and allows modifying shortcut commands created.

Move the User Experience to a Totally Different Dimension with Customizable and Aesthetic Interfaces

You can add new fields in forms within GO 3, and you can easily search in the lists with such fields. These features of GO 3 enable to customize on user basis the forms developed with simple and fast visual adaptation without the need for programming language knowledge. Besides, you can also completely input data into forms created with GO 3, by the help of wizard.

With GO 3 allowing you perform all your transactions over a single window, your information on the screen you work is protected, and you do not lose time by looking around several screens. In case you need to switch between different screens, you can switch with a single key.

Enrich Your Business Application with App-in-App Technology

With the app-in-app feature of Logo's GO 3, the following opportunities are provided;

- The opportunity to enrich the application in line with the requirements,
- The opportunity to download several functions in addition to standard features within the product, as application or widget by a single click,
- The opportunity to use the new features as platform-independent in line with the features within the app downloaded,
- The opportunity to quickly access to information by means of widgets enabling to display most frequently used transactions and reports on the main screen.

As well as applications and widgets provided with GO 3, all applications developed by Logo Business Partners are also provided to the users over Logo Store.

Fast Access to Your Transactions without Getting Lost in the Product Tree by means of Search Bar Feature

You can quickly access to all the module, screen, report, and transaction information by means of search bar feature. Likewise, you can also make a search in the application by means of the “fast access” feature you can select among the add-in list.
